PROGRAM TERMS AND CONDITIONS

Terms & Conditions The limited-time manufacturer incentive is available to members of participating utilities who purchase a qualifying Steffes ETS system between April 1, 2026 and September 30, 2026. Manufacturer incentives are administered through participating utilities and vary by utility program. This is not a cashback offer from Steffes. All reimbursement request forms must be submitted to Steffes by the utility on or before December 16, 2026, to qualify for the rebate. Qualifying systems include the 2100, 4100, 4200, and 5100 Series. Eligible installations may include replacement of existing Steffes ETS or comparable storage heating systems, as well as new installations. Proof of purchase and installation may be required. Incentives and program requirements vary by utility, and it is the member's responsibility to confirm eligibility. Additional utility incentives may be available, including per kW rebates and financing options. Check with your utility for details
